### **REASONS FOR ALLOWANCE**

1. Claims 2, 4-9, 11-13, 15-19, 21, 22, 24-28, 30, 32, 35-37, 39-41, 44-47, 49, 50-57, and 63-75 are allowed.

2. The following is a statement of reasons for the indication of allowable subject matter: The prior art, USPN 5,950,189 to Cohen, teaches a system for retrieving data from a database, wherein the system generates a sampled representation of the database according to a probability distribution over the records of the database. The data within the database is represented as a set of vectors of numeric values, with each database record within the database having a set of attribute values. The system identifies high-valued entries of non-negative matrix products without the need for full computation of the products. Each entry of the resulting product matrix corresponds to the similarity between a weight vector and a set of instance vectors represented as rows of a matrix that represents the database being processed. The probability distribution is determined by random walks on a weighted, directed graph that represents the database. The reference describes a random walk through a mathematical and graphical representation of feature values that describe characteristics of the data within a database, not a random walk through the data itself. The reference fails to explicitly teach or suggest all of the limitations of the independent claims. More specifically, the reference fails to teach the random selection of a new host, the random selection of a new document associated with the new host, and the selection of documents presents document links associated with the host. The method for randomly walking through a hyper-text-linked-document set comprising a plurality of documents, wherein at least a subset of the documents contain a plurality of links to other documents, each document being associated with a host, is not explicitly taught or

suggested within the reference to Cohen. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Ludwig whose telephone number is (571)272-4127. The examiner can normally be reached on 9:00am-6:00pm.
